## Notice of Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2002, 37 CFR 1.18 is proposed to be revised to change the patent issue fees as set forth below. As stated above, the final fees may be a different amount, and applicant should check the web site given above when paying the fee.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (Sec. 1.27(a))--\$655.00

By other than a small entity--\$1,310.00

(b) Issue fee for issuing a design patent:

By a small entity (Sec. 1.27(a))--\$235.00

By other than a small entity--\$470.00

(c) Issue fee for issuing a plant patent:

By a small entity (Sec. 1.27(a))--\$315.00

By other than a small entity--\$630.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

being configured to expect a Reverse Control Channel signal including a Mobile Identification Number and an Electronic Serial Number, the triggerable location-reporting apparatus comprising:

- C1
- a GPS receiver responsive to the GPS signals for producing GPS data when enabled;
  - a data selector for selecting less than all of the GPS data, to produce selected GPS data;
  - a cellular network transmitter coupled to the data selector for formatting and transmitting, when enabled, a Reverse Control Channel signal including the selected GPS data in the place normally occupied by the Electronic Serial Number and a Mobile Identification Number that will cause the cellular base station to send a Registration Notification Invoke signal including the selected GPS data to the gateway;
  - a trigger signal receiver responsive to the trigger signal for producing an enable signal;
  - an enable controller coupled to the GPS receiver, the cellular network transmitter, and the trigger signal receiver;
  - the enable controller being configured to enable the GPS receiver and the cellular network transmitter upon receipt of the enable signal from the trigger signal receiver; and
  - the enable controller being configured to disable the GPS receiver and the cellular network transmitter[.];

wherein the data selector reorders the selected GPS data.

Application/Control Number: 10/008,893

Page 4

Art Unit: 2683

2. ~~19.~~ (Amended) A method for reporting a location for an object in an environment including: a source of Global Positioning Satellite System (GPS) signals; a source of a trigger; a cellular base station connected through a network to a gateway; the cellular base station being configured to expect a Reverse Control Channel signal including a Mobile Identification Number and an Electronic Serial Number, the method comprising:

location data when enabled;

a data selecting device for selecting less than all of the location data to include in the location signal;

C3 a telemetry transmitter coupled to the data selecting device configured to transmit the location signal when enabled; and

an enable controller configured to enable the location-signal generating device and the telemetry transmitter when it receives a trigger signal and to disable the location-signal generating device and the telemetry transmitter after the telemetry transmitter transmits the location signal[.];

wherein the data selecting device reorders the selected location data.

***Information Disclosure Statement***

4. The information disclosure statement submitted on May 28, 2002 been considered by the Examiner and made of record in the application file.

***Allowable Subject Matter***

5. **Claims 1, 19, and 26** are allowed and they were renumbered 1-3, respectively

6. The following is an Examiner's statement of reasons for allowance:

Art Unit: 2683

Consider **claims 1, 19, and 26**, the prior art of record fails to teach, disclose, or suggest a method for reporting a location and a triggerable location-reporting apparatus comprising essentially of: a location-signal generating device producing a location signal including location data when enabled; a data selecting device selecting less than all of the location data to include in the location signal and reordering the selected location data; a telemetry transmitter coupled to the data selecting device configured to transmit the location signal when enabled; and an enable controller configured to enable the location-signal generating device and the telemetry transmitter when it receives a trigger signal and to disable the location-signal generating device and the telemetry transmitter after the telemetry transmitter transmits the location signal.

The most relevant prior art found during the examination of the present application, Janky et al. (U.S. Patent # 5,777,580), fails to specifically teach, disclose, or suggest a data selecting device that is capable of both selecting less than all of the location data to include in the location signal and reordering the selected location data.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

7. The application having been allowed, formal drawings are required in response to this
